

DIGITALIZED CONSTRUCTION DIRECTORY

EXECUTIVE SUMMARY

ProBuild was founded by a young entrepreneur who while working in the industry, envisioned better methods than the traditional practices in place. With all the other industries getting heavily digitalized, the construction industry has fallen somewhat behind, and that is where ProBuild comes in.

ProBuild is a user-friendly construction directory featuring listings of contractors, suppliers, manpower agencies, architects, engineers, and freelancers in the Kingdom of Bahrain. We provide vendors with the tools they need to develop and enhance their web presence by giving them access to various new marketing possibilities that were unavailable to them.

WHY PROBUILD

The platform is developed exclusively for the construction industry to help clients and vendors discover new connections and build lasting relationships with trusted partners.

MISSION

By celebrating and investing in modern technology, we seek to create rewarding opportunities for construction companies and provide exceptional results for our platform's users, supporting the local community as well as the Bahrain Economic Vision of 2030.

VISION

Using modern principles and sophisticated technologies, ProBuild envisions being the leading construction directory in the MENA market, delivering excellent value & innovative construction solutions to meet our client's requirements.

FOR VENDORS:

-  Three cost-effective subscription packages, tailored to companies diverse needs
-  Gain exposure and vendor visibility by setting priority in search engine results
-  A digital tender board for vendors to browse through potential customers requirements
-  Ability to provide online quotations, and receive call-back requests from potential clients
-  Bonus marketing opportunities in the form of advertisement banners & Social Media targeted advertisements.
-  Option for account verification
